

CONTENTS

S. D. Aitzhanova, N. V. Andronova Search and creation of source material of garden strawberry for the priority directions of breeding	13
E. V. Ambros, S. Yu. Toluzakova, T. I. Novikova The effect of light - emitting diodes and fluorescent light on development of <i>Fragaria</i> × <i>ananassa</i> Duch. regenerants during <i>in vitro</i> rooting stage	18
M. I. Antipenko Adaptation potential of strawberry cultivars in the conditions of the Samara region	25
A. V. Artyukhova, O. A. Sorokopudova The adaptive potential of ornamental shrubs of the FSBSI ARHIBAN collection	29
A. V. Batmanov Ecological evaluation of cultivating promising varieties of strawberry in the steppe zone of the Samara region	33
E. P. Bezukh, N. N. Potrahov, V. B. Bessonov Radiography quality control of seeds of pome crops	38
O. V. Blednykh, K. S. Spirin Population dynamics of the apple moth and scab on the apple tree in the Research Institute “Zhigulevsk Gardens” orchards	43
T. V. Bogdanovich Peculiarities of growth and fruiting of the genotypes of the apple tree of the NCRRIH&V collection	47
A. I. Bochan, V. V. Opimakh, I. V. Pavlova, V. S. Anokhina, I. B. Sauk Creation of new source material for beetroot breeding by the method of induced mutagenesis	52
Yu. V. Burmenko, V. N. Sorokopudov Methodical aspects of golden currant breeding on the basis of characteristics “mass” and “berry size”	56
I. A. Bjadovskiy The influence of components of the nutrient media and the low temperature on the storage capability of Rowan (<i>Sorbus</i>) <i>in vitro</i>	60
I. A. Bjadovskiy Effect of 6-benzylaminopurine and tidiazuron on the process of clonal micropropagation of plants of the genus <i>Malus</i> Mill.	65
S. V. Goncharova, Ye. M. Tsukanova Influence of weather conditions on biometric indicators and seed productivity of aster annual <i>Callistephus chinensis</i> (L.) Nees.	70
L. A. Gruner, O. V. Kuleshova Peculiarities of phenological phases of blackberries in conditions of Orel region	75
A. G. Gurin, S. V. Rezvyakova The nutrient removal by grasses in sod-humus system of soil maintenance of the garden	81
S. V. Dobezhina, M. T. Tuov Influence of finely dispersed watering on the microclimate in the ecosystem of a tea bush in the conditions of Adygea	85
M. V. Dudov, M. S. Gins, A. A. Baikov Physiological and biochemical characteristics of potato leaves in norm and damage to aerial parts of the plant by the Colorado beetle	90
I. L. Efimova Effect of roots mycorrhization of seedlings on the productivity of apple trees in the initial period of fruiting	94
J. S. Zapolski The influence of growth stimulants on rooting of cuttings of honeysuckle edible (<i>Lonicera caerulea</i> L.)	98

R. S. Zaremuk, T. A. Kopnina The results of breeding use of gene pool of cherry in NCRRIH&V	103
A. S. Zeynalov Dangerous pests and diseases of pears in the Central Nonblack soil region and the main directions of measures on regulation of their number and harmfulness	108
A. S. Zeynalov, G. Yu. Upadyшева, V. V. Lyanov Aggressive pests in entomocarological community of plum in Central Non-Black Earth Region and basic principles of the control of their harmfulness	113
A. S. Zemisov, V. V. Abyzov, N. V. Borzykh, V. V. Chiviliov, S. A. Malgin, T. V. Kovalenko Resistance of grape and sweet cherry to fungal diseases under the condition of the Central chernozem region	118
E. A. Ivanova, M. A. Tikhonova, G. R. Mursalimova Selected <i>Ribes aureum</i> Pursh forms in the conditions of South Ural	121
E. V. Ivanova, V. N. Sorokopudov, O. A. Sorokopudova Pests and diseases of ornamental apple species in the south-west of the Central Chernozem Region	125
M. V. Kanshina Ecological stability of sweet cherry's varieties in the south of the Non-Chernozem Zone	130
N. N. Karpun, V. Ye. Protsenko Peculiarities of the pest organisms complex on citrus fruit crops in humid subtropics of Russia	136
N. Ya. Kashirskaya, E. M. Tsukanova, A. M. Kochkina Orchard protection against scab as dominant disease	140
N. Ya. Kashirskaya, E. M. Tsukanova, A. M. Kochkina The use of preparations from the group of immuno- and growth regulators against apple scab	144
A. A. Keldibekov, E. N. Sedov, Z. M. Serova The longevity and the yield of dwarf orchard of apple the cultivar «Bolotovskoe» when using intercalary rootstocks breeding ARRIFCB	148
M. A. Keldibekova, S. D. Knyazev, M. A. Makarkina, M. V. Tovarnitskaya Biochemical evaluation of promising black currant genotypes breeding of ARRIFCB	152
A. A. Krinitsina, O. A. Churikova, M. A. Antipin Peculiarities of morphogenesis of <i>Ficus carica</i> L. in <i>in vitro</i> culture	156
A. P. Kuznetsova, A. I. Drygina, S. N. Scheglow The use of biotechnological methods to improve the yield of high-quality planting material of stone fruits	160
A. V. Lisina, V. F. Vorobyov Ozone technology of fruit storage is a real reserve to improve the fruits quality	164
I. V. Luk'yanchuk Creating a qualitatively new strawberry genotypes with high resistance to abiotic stressors and valuable commodity and consumer qualities of the fruit	169
A. S. Lyzhin, N. N. Savel'eva The use of DNA markers in apple breeding of scab resistance	173
S. A. Makarenko Resistance to scab of <i>Malus baccata</i> hybrid populations	177
E. V. Malaeva, O. I. Molkanova Biotechnological and economic aspects of clonal microreproduction primocane raspberry	183

O. I. Molkanova, T. S. Staheeva, O. G. Vasilyeva, D. A. Egorova Peculiarities of <i>in vitro</i> cultivation of valuable small-fruit crops	190
Cveta Moskova, Stamen Dimitrov, Miroslav Tityanov Influence of the length of stay in the soil of seed of <i>Amaranthus blitoides</i> L. and <i>Amaranthus albus</i> L. on their rest and germination	195
G. R. Mursalimova, Z. A. Avdeeva The effect of natural growth regulators on biometric indicators of clonal rootstocks of Apple	200
N. V. Myasisheva, M. A. Makarkina Dynamics of changes gelling properties of pectin of red currant berries under low temperature	204
V. L. Nalobova, A. I. Bokhan Influence of different terms of sowing and storage mediums on disease affecting the mother carrots roots	208
A. A. Nikitenko The effect of substratum composition on the content of major nutrient elements in the leaves of apple shoots	213
O. I. Pashchenko New varieties and perspective hybrids of freesia	217
A. D. Petrova, M. T. Upadyshev, K. V. Metlitskaia, V. I. Donetskich Effect of of magnetic and light pulses on the vegetative productivity of strawberry under greenhouse conditions	223
V. N. Podorozhniy, N. N. Kovalenko. S. V. Sibiriatskin Dry-air device for thermotherapy garden plants and cuttings	227
L. V. Pomyaksheva, S. N. Konovalov Influence of the amount of atmospheric precipitation on the productivity of strawberry garden plants during fertigation and drip irrigation on sod-podzolic soils in Moscow region	233
G. D. Popov Peculiarities of manifestations of self-compatibility in pear and haploid obtaining	238
T. G. Prichko, T. L. Smelik, L. A. Khilko Biochemical parameters of the raspberry berries quality taking into account the variety peculiarities	242
I. D. Sazonova Comparative evaluation of the biochemical composition of fresh and frozen strawberry berries	248
A. V. Satibalov Breeding estimation of pears collection by main economic-valuable attributes	253
N. N. Sergeeva Foliar fertilizing in the apple-tree fertilizer system in the conditions of the Western Ciscaucasia	257
S. V. Sibiryatkin Influence of the spectrum of light on the growth of the rootstock of sweet cherry in the dry air of thermotherapy	263
N. N. Sokerina Biochemical composition in berries of gooseberry in conditions of the Komi Republic	268
V. N. Sorokopudov, A. G. Kuklina, I. V. Movchan Harmful entomofauna and mycoflora in the culture of <i>Lonicera</i> L. in Russia	274
T. S. Staheeva, O. I. Molkanova, L. N. Konovalova Some aspects <i>in vitro</i> propagation of promising varieties of high and half-high blueberry	279
M. E. Stolyarov Dynamics of exchange forms of potassium in gray forest soils of the young apple orchard with the introduction of mineral fertilizers	286

I. V. Sycheva, V. V. Mameev Diagnosis of distribution of leaf-stem diseases of winter wheat in the Bryansk region and the effectiveness of Akanto plus	290
I. E. Fedotova, O. V. Ostrikova, E. L. Harhardina The development of explants of cherry sour distant hybrids at the clonal micropropagation	295
N. V. Khromov A comparative study of cultivation technologies of saskatoon	299
T. A. Chaplygina Yields of introduced varieties of black currant in the midst of the Samara region	304
A. G. Shevkun Evaluation of susceptibility of cultivars of intersection hybrides of paeonia to leaf spot	308
V. E. Ydaeva, A. I. Bokhan The study of collection samples and breeding of garden radish in the conditions of the Central region of Russia	312
N. D. Yagovtseva The study of frost-hardiness of source varieties and forms of raspberry in conditions of Western Siberia	315
